Ever since 1993, the NCAA Football Series has thrived, capturing the college football gameday experience with legendary game modes and customization.

One of the
best sports

The Series was discontinued in 2014 due to a court case.
This deemed NCAA FB 2014 the last of its kind, making it
even more legendary.

Come 2023, the series looks to make a return as the NCAA has finally implemented more fair rules for players to profit off of their name, image, and likeness.

The Return.

How EA Sports College Football Will Compare To Madden NFL

1 2

When EA Sports College Football releases in 2023, longtime players of the Madden NFL series will be right at home with how it plays. That's because the game will utilize a lot of the same core gameplay as Madden when it launches.

The game will have a separate development team to handle College Football-specific features, modes, and elements. However, the gameplay team will utilize the same technology that Madden has. That means the same engine, animation technology, and more.

Should the studio decide to change game engines down the line, the assumption is that both games will change at, or around, the same time.

💬 Group Conversation Questions

Think-aloud Protocol

Here's some strategies I took to facilitate the playtest with think-aloud protocol.

Building Rapport

- Served them pizza
- What's your favorite memory of this game?
- What's your favorite thing about this game?
- What should kept, changed, or updated?

Follow-up Questions

- Earlier, you said [x]. Could you tell me more about that?
- Earlier, you were saying [x]. What did you mean by that?
- Could you be more specific?

Informal Interview Questions

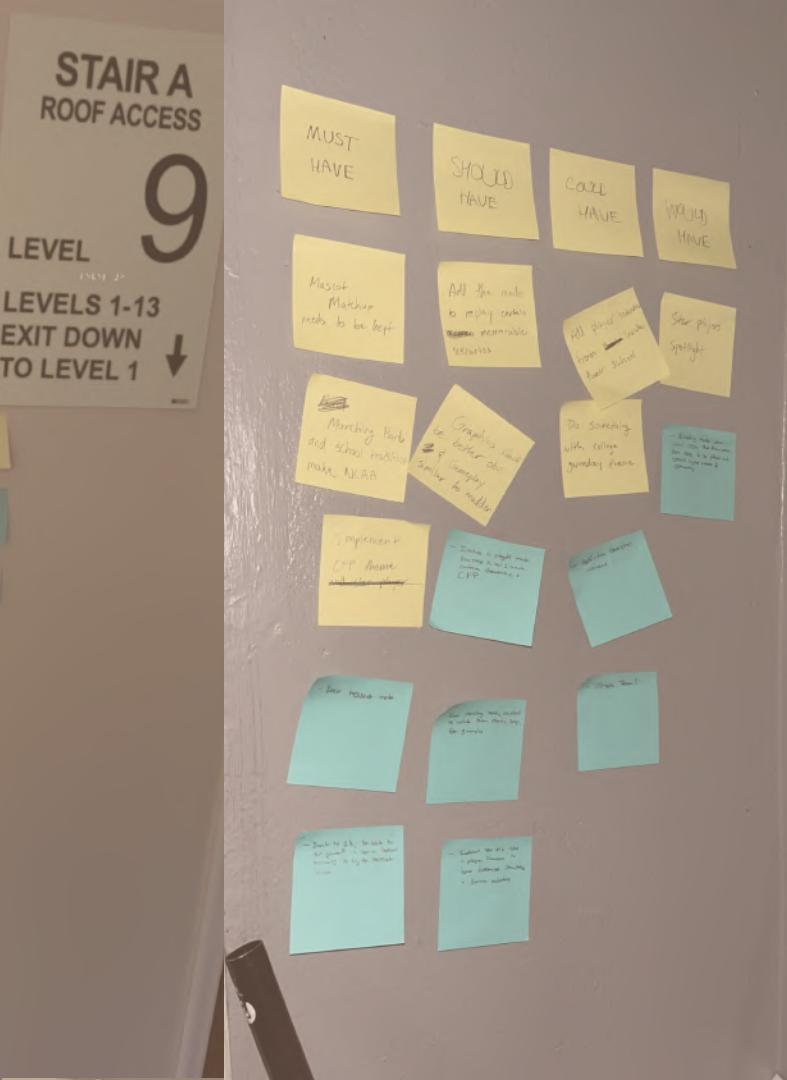

These questions helped reach the heart of die-hard fans' wants and needs.

Before

- What was it like for you when you watched and listened to the pre-game presentation?
- Tell me about a time when you felt immersed in the CFB environment during the game?
- Give me an example of an aspect of the game's presentation that made you feel immersed in the game?
- What is your favorite part of the game's presentation?

After

- What's an aspect of NCAA Football 14 that is unique to the college football xp?
- How has the college football scene changed since 2014? Give me one example of how this change might be implemented in the NCAA FB.

Themes

Playtest Think-aloud

The following themes arose from think-aloud conversation during playtests.

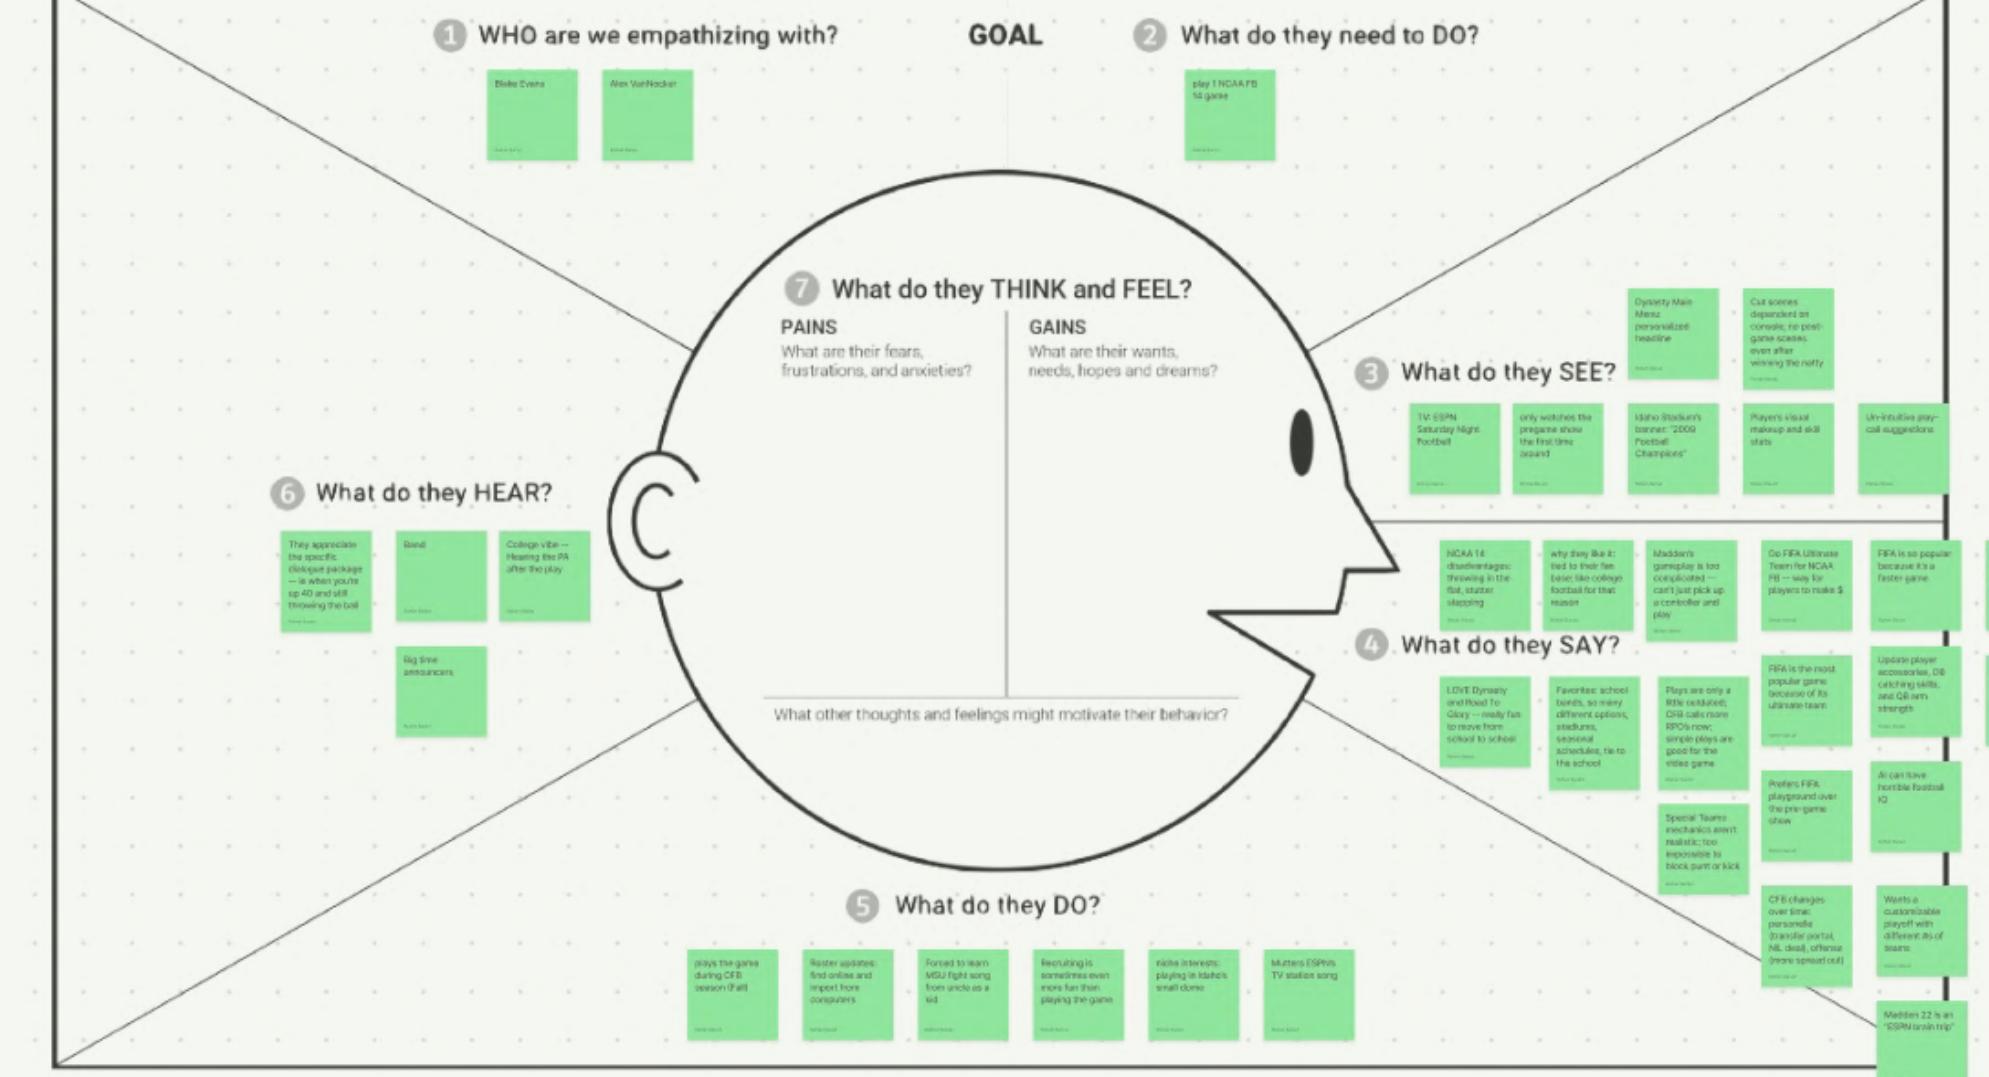

School Affiliation

Game Options & Customizability

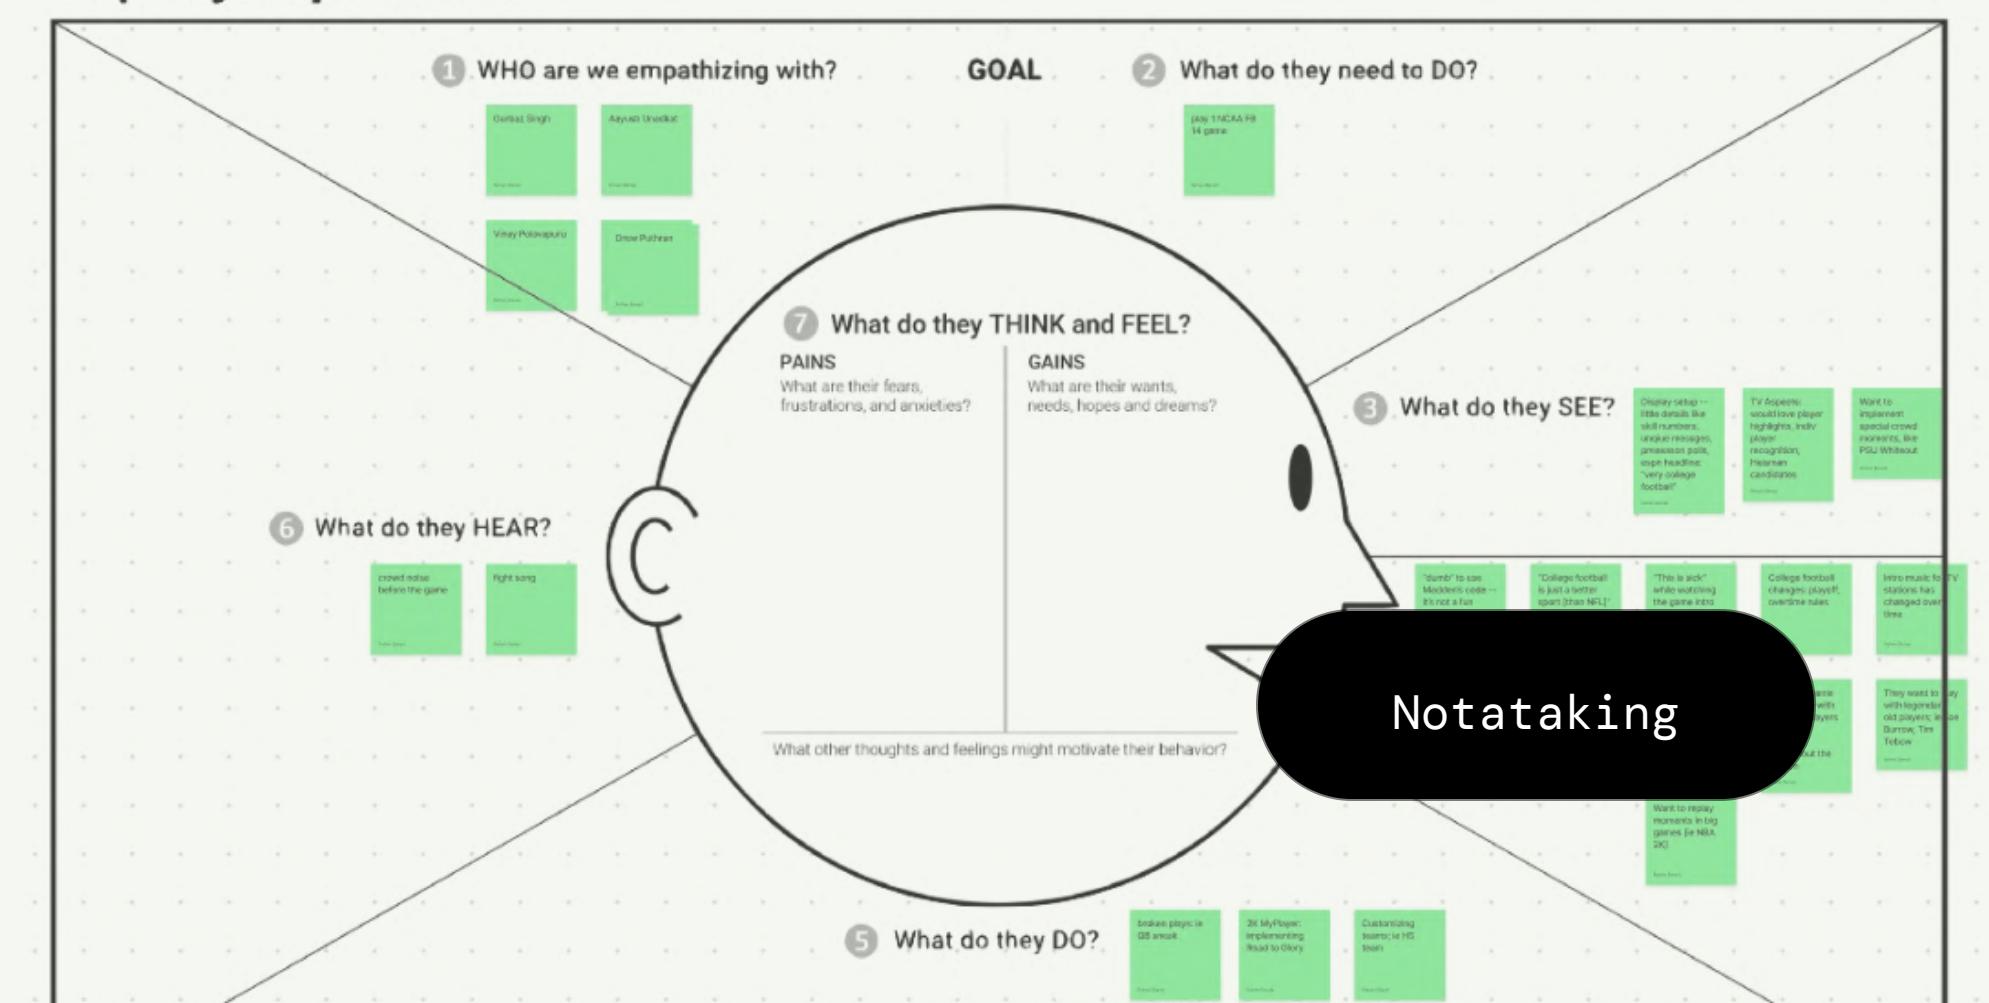

Sports Game Analogies

TV-like Experience

Audial Elements

Empathy Map Canvas

Notataking

School affiliation brings heart to the game.

The NCAA Football series captures what it means to be a fan. Throughout my research, participants described their love for the game in relation to school affiliation.

First, players love hearing their school's band play. They love how every stadium is tailored to perfection. They even experiment with being fans of different schools, calling out game aspects from the school-branded dashboard for Dynasty Mode to unique banners and dome-like structure to Idaho Football's stadium.

One fan mentioned that he only plays this in the Fall season. Come 2023, this game should be released in the Fall.

The Big House

Game Modes & Customization

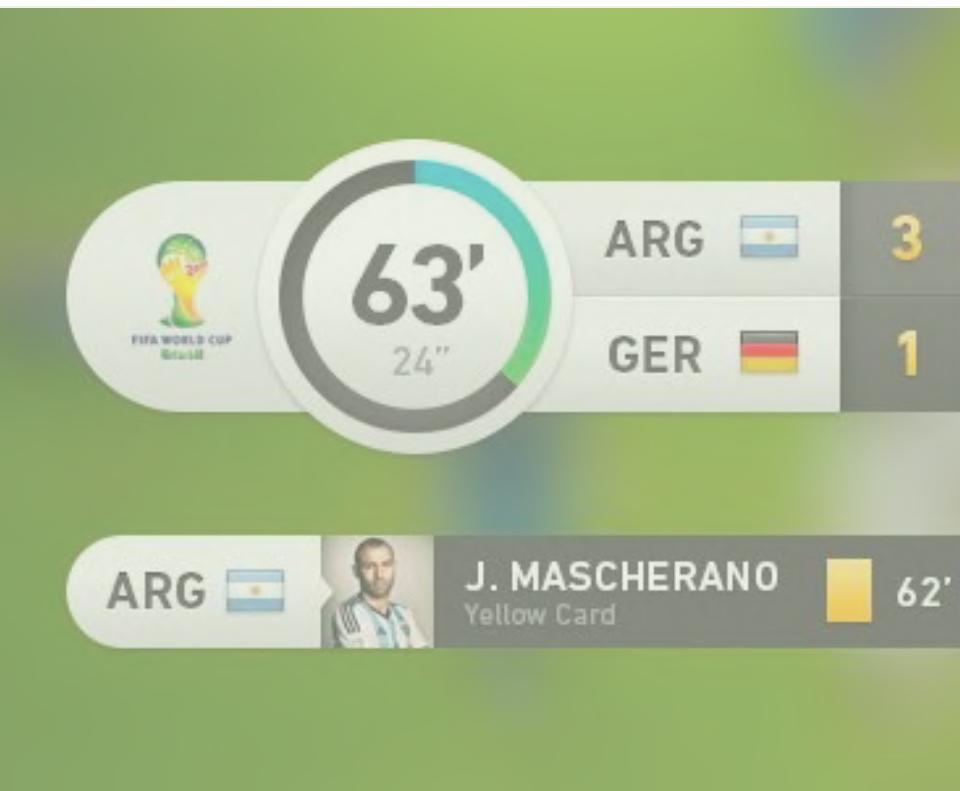

Another theme that makes this series "built with love" is the great extent of game modes and customization. Road to Glory, Dynasty Mode, and customized rosters all make NCAA 14 so legendary.

One player describes enjoying the recruiting portal in Dynasty Mode even more than playing the game itself. On and off the field, every game mode matters; from uploading yearly rosters to creating online sensations like "Coach Duggs", this series will continue its success via customizability.

Drawing Inspiration

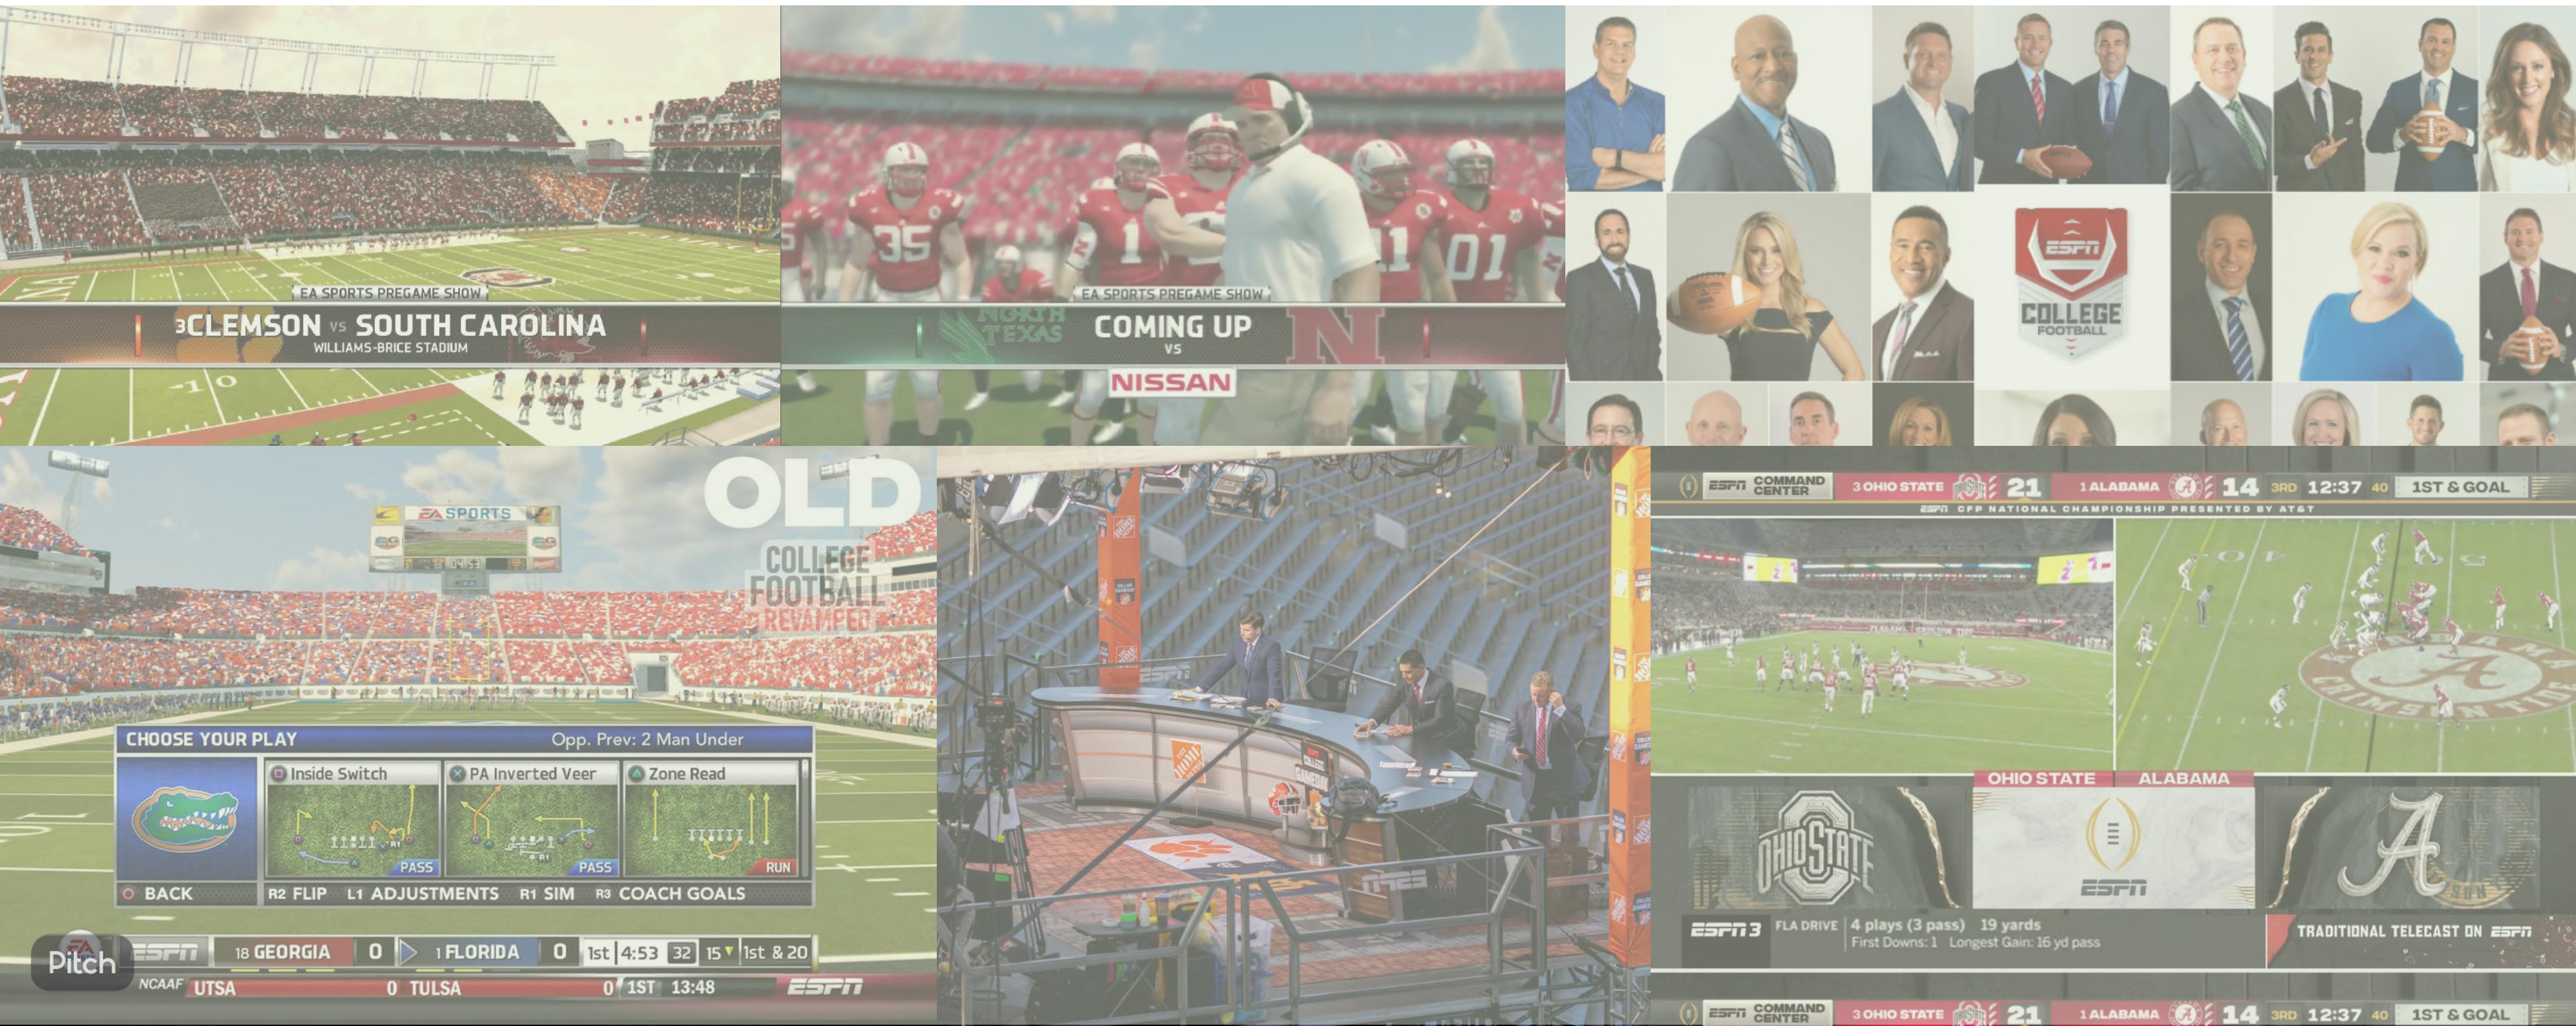

Participants liked to draw analogies from FIFA and NBA 2K in their ideation for NCAA FB '23.

Game Elements

TV-like experience

From commentary to pre-game shows and even the scoreboard, the game's presentation is essential to its brand.

Audial elements are essential to the game's presentation.

Here's a list of some things that subjects had a liking for:

- Crowd Chants
- ESPN's college football theme song (one player muttered the song after it was played)
- Pre-determined commentary or "dialogue package"
- Band playing the school's fight song
- The PA announcing what happened after the play
- Ambient noise during play-call; helps them focus on picking a play

Affinity Diagramming & Severity

Together, the ideas generated during playtests and design ideation produced lots of data.

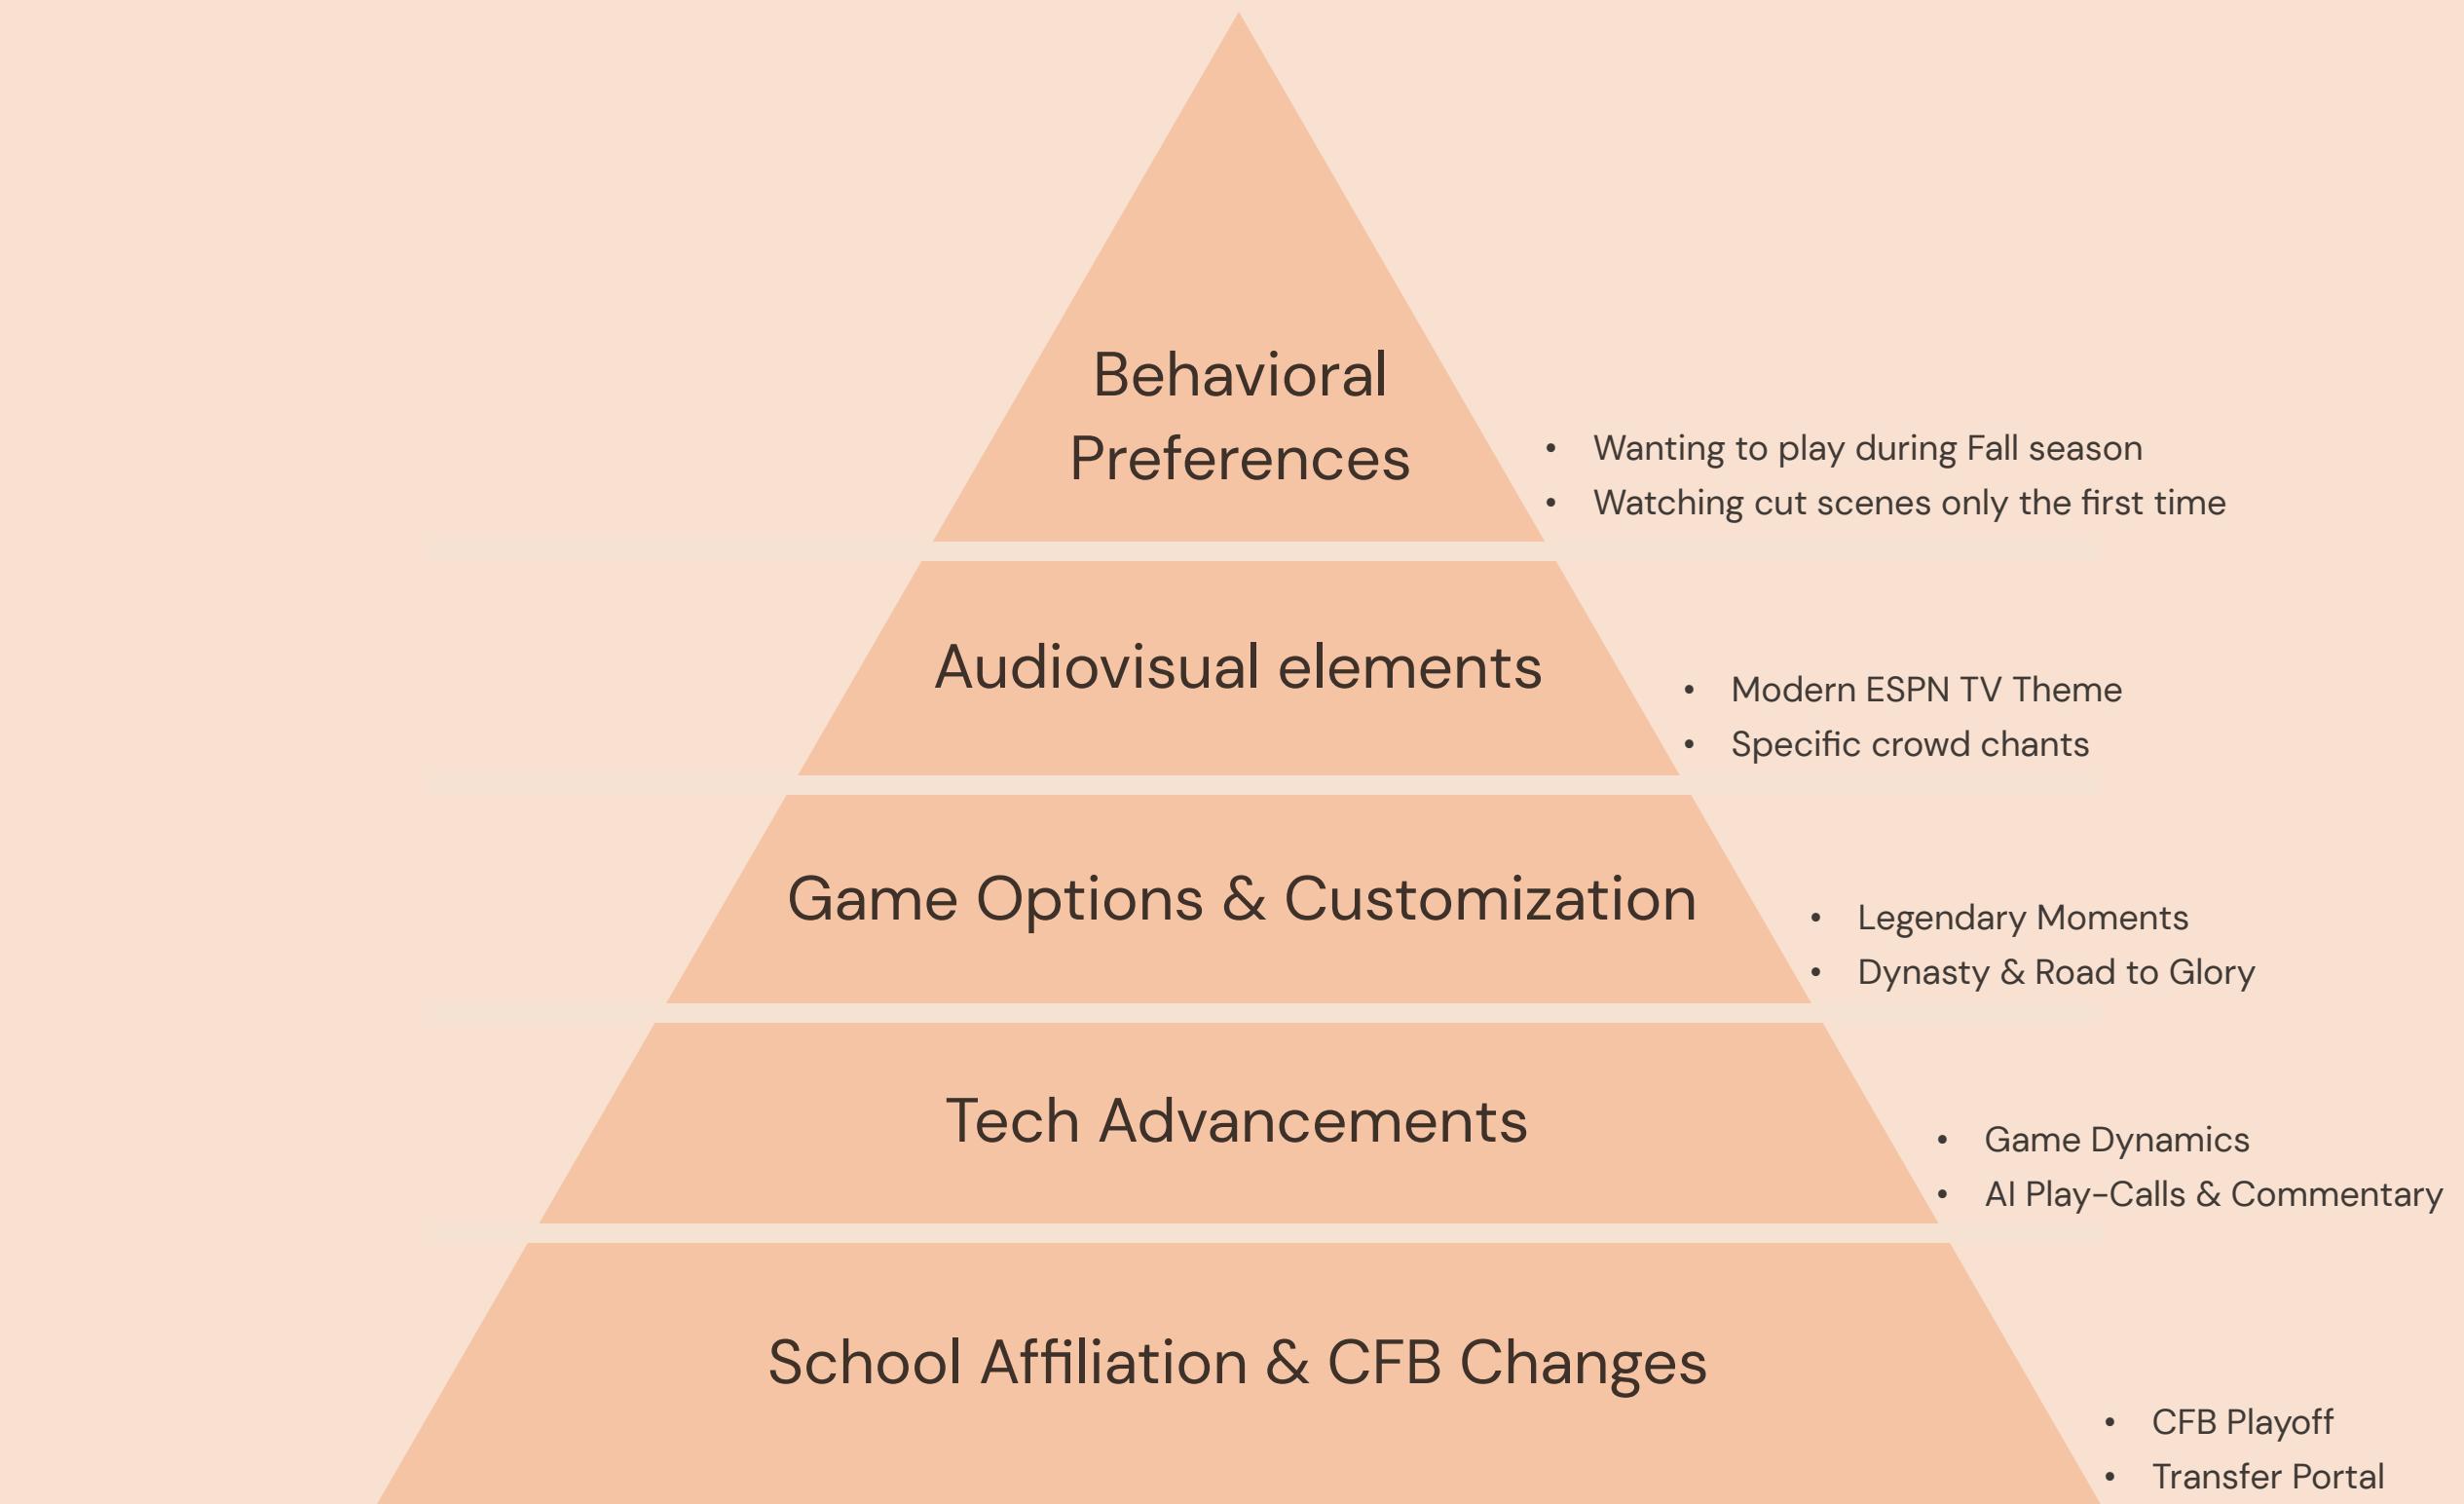

Organizing this by theme, it can be seen that different themes have different levels of severity; after all, participants' ideas in yellow and blue are more important to them than those in brown and purple.

Hierarchy of Needs

Drawing from the previous slide's prioritization, the organization of themes can be flipped on its nose to represent a hierarchy of needs.

For NCAA Football 2023, game designers should work from the bottom upwards. One by one, these themes effectively recreate the magical college gameday experience. From school fandom to crowd-specific chants, this hierarchy is a helpful guide to processing an influx of feature ideas.

School Affiliation & CFB Changes

01

keep

- School-specific dashboard in Dynasty Mode
- Emphasis on stadium design
- Asking the player what their favorite team is
- All Division I Schools

02

change

- Implement more crowd themes, like chants and colors (like PSU's whiteout)
- Add Division II and Division III
- Add legendary players for each program (like Denard Robinson, Charles Woodson)

03

update

- School traditions
- Add new in-game opportunities for players to profit from their N.I.L.
- Implement NIL Deals in recruiting

Tech Advancements

School Affiliation & CFB Changes

01

keep

- Infinity engine of game dynamics – flows nicely into the NCAA Football Series brand
- Simple gameplay – don't make it too complicated
- Game controls

02

change

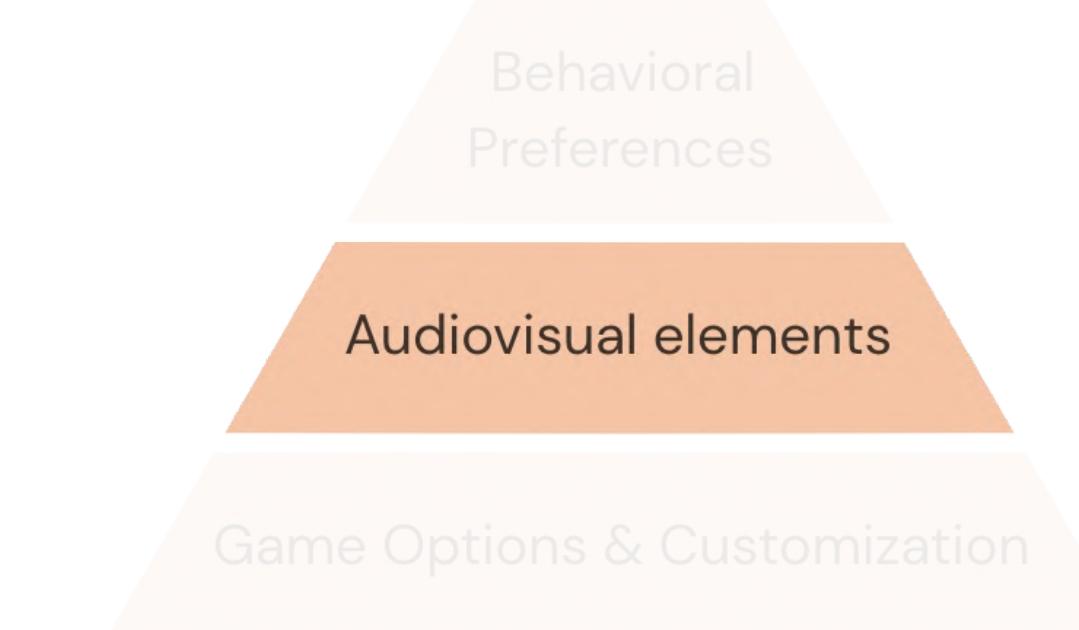

- QB intuition
 - Running from the pocket
 - Throwing in the flat
- Defensive Catching Ability
- Special Teams playcall
- Offense: spread it out and add run-pass options

03

update

- Options to share game experiences on social media
- AI-based playcall suggestions (football IQ)
- Player image quality
- Animations
- Make the dialogue package more advanced

01

keep

- Pre-game Show
- Stadium makeup (banners)

02

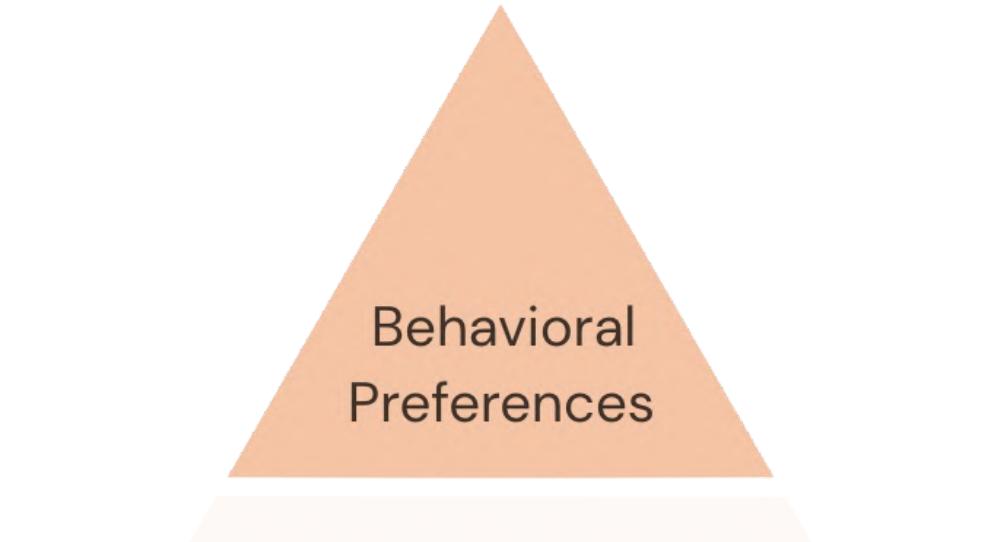

change

- Add trophy presentations after championship games
- Consider implementing a "FIFA-like Training Challenge" as the game loads
- Add school-related music to the PA system, like Mr. Brightside and Pump It Up

03

update

- ESPN's Saturday Night Football game presentation (theme song, scoreboard, interface)
- Number of commentators
- Player Accessories
- Update College Gameday theme/ branding
- Add halftime coach's interview

01

keep

- Stats & analytics – gives a college football feel

02

change

- Release the game during Week 1 of the College Football Season (September 2023)
- Focus on the first impression for cut scenes, because players only watch them the first time

03

update

- Add special cut-scenes for rivalries – players love setting up rivalry games
- Add post-game content – players tend to keep the TV on after finishing a game

Next Steps

School Affiliation & CFB Changes

The next steps are laid out by the pyramid, starting bottom-up. Researchers should start validating assumptions about what players want at each step. Thus, to assess how players enjoy their school affiliation and the current college football scene, researchers should hold **user interviews** with die-hard fans to understand whether their ideas are favorable.

On this note, it is important to assess the release date of 2023. If the game is not ready, it should not be sped up and released. What's most important is that the game is likeable; fans have already waited for 8 years and counting, so they wouldn't mind waiting an extra year. The reason I am addressing this is because with the Madden engine, it's highly likely that NCAA Football 2023 will not be received well. After all, die-hard fans have a strong dislike for Madden, and would rather prefer a re-release of the 2014 game over any sort of Madden technology. With the pyramid, each step will ensure that players receive the game well; slowly, but steadily, the next iteration of this series will be a hit with through further research of players' assumptions and behaviors related to these steps.
